GREEN ECONOMY: A CHALLENGE FOR THE NEW LEGISLATURE

7th e 8th november Ecomondo - Rimini Fiera

PROGRAM2017

THE REPORT ON THE STATE OF THE GREEN ECONOMY

EXECUTIVE SUMMARY

2017

The **Third Report on the State of the Green Economy** sets the scene for the 2017 session of the States General of the Green Economy that is taking place on the eve of the parliamentary general election. The Report focuses on policy proposals for a transition to a green economy to be submitted to political parties before the election, with the aim of putting concrete problems and related policies at the center of the confrontation.

The first part of the Report shows the results of a survey on citizens' opinion on green economy policies in cities, commissioned by the Foundation. The survey asked a representative sample of citizens on climate and energy, circular economy and urban regeneration, natural capital and green infrastructure, sustainable urban mobility and benefits of the green economy in local development. The results show that consensus on green economy policies on such issues goes beyond expectations. And a fact: efforts at the local level are acknowledged, though with significant room for improvement.

The second part of the Report updates the analysis of the status of the green economy implementation in Italy, with a focus on some key areas: GHG emissions, energy efficiency and energy saving, renewable sources of energy, circular economy, eco-innovation, organic farming, territory and natural capital, sustainable mobility.

The third part of the Report focuses on a comparison between the European Union, China and the United States, also taking into account possible changes in the United States under the new Administration. At the same time, it provides a snapshot of green economy implementation worldwide, as well as of significant international trends and achieved results.

The Report is coordinated by the Foundation for Sustainable Development, acting as the substantial secretariat of the National Council of the Green Economy.

07/11 2017
