AND NEW EMPLOYMENT.**

PRIORITIES TO BOOST
ITALIAN ECONOMY

REPORT 2018 ON THE STATE OF GREEN ECONOMY

“Green economy and new employment to boost Italian economy” is the theme for the 2018 States General of the Green Economy, introduced, this year as well, by the **Report 2018 on the state of green economy**, now at its fourth edition.

Adopting and implementing ten key green economy policy measures in various sectors over the next ten years, can generate 2.2 mln work units (3.3 including satellite activities) in the next five years. This is what can be read in the first part of the Report, publishing data from a study commissioned by the Sustainable Development Foundation, on green economy development potentials for environmental benefits, well-being and life quality, as well as for an increase in goods and services production and their added value, especially for job creation.

The second part of the Report updates the analysis of the status of green economy implementation in Italy, with a focus on some key areas: GHG emissions, energy efficiency and energy savings, renewable sources of energy, circular economy, eco-innovation, organic farming, land and natural capital, sustainable mobility.

This year, the Report devotes an additional part to the way towards green cities. Cities are, in fact, a laboratory for developing advanced and integrated solutions for green economy implementation in the urban context, coupling environmental quality, circularity and efficient use of resources, actions to face the climate crisis by adopting adequate governance instruments. Italian cities show an overall delay, though with some leading examples.

In conclusion, the fourth part of the Report provides an updated overview of green economy implementation worldwide, relevant international trends and progresses made, with a focus on worldwide jobs creation due to green economy implementation.

Agenda

6th November 2018

PLENARY OPENING SESSION

from 10.30 am to 1.00 pm | ROOM NERI - HALL SUD

Green economy and new employment.
Priorities to boost Italian economy

THEMATIC SESSIONS

from 3 pm to 6.00 pm | ROOM NERI 2, HALL SUD
